

Increased growth for Asbestos Services UK in regional expansion

Asbestos Services UK continues to consolidate its presence as a leading licensed asbestos removal specialist in the North West, whilst expanding the business further afield.

A number of new contracts have been secured across the UK including a series of removal programmes for leading social housing provider, Riverside in Hull and Newcastle.

A team has now been established within the areas who will be appointed to carry out important works during the next six months. Projects consist largely of removal of various asbestos materials from Riverside homes as part of planned refurbishment works.

AS UK has worked for Riverside for several years, predominantly within Merseyside and considers the additional work as testament to the success of the model within this area.

Dave Coleman, Managing Director of Asbestos Services UK commented:

"It's great to see the business naturally evolve and expand further afield, particularly based on the repeat business relationship that we enjoy with Riverside."

"We have worked hard to ensure that the processes and procedures that we employ are of the highest quality, consistently ensuring that health and safety is our number one priority. We will continue to roll out this model across the UK and slowly grow our business as demand continues."
