Total asbestos services on a national scale for government, commercial, industrial and domestic sectors

Asbestos Services UK Ltd is a Wirral-based company, undertaking projects all over the UK.

## Sectors we work in

For all asbestos matters, we have a proven track record across the full range of sectors:

### Residential works

Including Registered Social Landlords, Housing Associations and private homeowners.

### The Education Sector

We offer flexibility to fit in with the academic year and the client's needs.

### Industrial and Commercial projects

Where teams work in open and confined spaces.

### And government and public sector projects

Where sensitivity and privacy is vital.

Vast experience and proven expertise in all asbestos works

# Trusted experts in all asbestos matters

We are a trusted firm committed to providing honest, high quality, thorough services.

Operating under stringent health and safety regulations, we ensure that the team, customers and the public are protected from any removal works.

We are qualified experts, fully licensed by the HSE, with extensive accreditations, and **staff trained to the highest standards.**

Using the latest technology, we ensure asbestos removal is fast, efficient and safe leaving no trace of asbestos fibres. A lot of our work comes from recommendations and repeat business – we have an extensive list of reputable clients including major international and national companies.

## Accreditation, Quality, Health & Safety

*Peace of mind for our customers - fully licenced, fully insured and accredited.*

Asbestos Services UK Ltd is fully insured and fully licenced by the Health & Safety Executive (HSE) to carry out all asbestos work.

### ISO 9001

### ISO 14001

- Awarded both the **ISO 9001** and **ISO 14001**, both quality management systems relating to a business's performance and commitment
- **HSE Licensed Asbestos Remover** under HSE Licensing Regulations
- Accredited member of **CHAS** (Contractors Health & Safety Assessment)
- Accredited Member of **Construction Line**
- **Environment Agency** Licenced Waste Carrier

# Our Clients

*Repeat business clients include major international and national companies.*

*" Our business depends on our clients' satisfaction. A significant amount of our work comes from recommendations.*

*Therefore, our customer guarantee of excellent service and workmanship comes from our determination to protect our hard earned reputation.*

“

## Case Study: Frank Rogers (Golden Gates Housing Association)

Frank Rogers was awarded the contract to carry out asbestos removal at over 400 homes

Part of Frank Rogers supply chain and their approved asbestos removal partner, Asbestos Services UK were involved in this project from the planning stages. Following a series of survey and sampling works, over 400 homes had been found to have been affected by asbestos and a concise programme developed to manage the works under controlled, specialist conditions.

The external soffit board of the properties contained asbestos in two forms, asbestos cement board or asbestos insulation board, each of the properties were affected by one of the two different types of asbestos, each demanding a different approach.

The level of risk the asbestos posed was dependent on what material the asbestos was found in. Where asbestos was found in cement the threat was considered low risk because of the rigidity of the board, therefore less likely to release fibres. If, however, the asbestos was found in insulation board, as was the case at some of the properties inspected, the risk was higher as the material was more likely to be fibrous.

The properties were split into two categories dependent on which areas were affected. Full enclosure set up was erected across the properties considered high risk whilst work was managed at the remainder of the homes using low level access equipment. For those living in high risk properties, tenants were asked to vacate the premises for the day the day whilst work was carried out.

The programme was carried out across a five month period and tenant liaison was critical. Frank Rogers appointed a full time tenant liaison officer who ensure programming ran smoothly and any concerns were dealt with and managed effectively. Both Asbestos Services UK and Frank Rogers received exceptional levels of positive tenant feedback throughout whilst two HSE inspections carried out during the contract duration also gave positive feedback.

**Dean Rogers, managing director of Frank Rogers commented:**  
*"The team at Asbestos Services UK provided fantastic service through this complex and large scale project. Their attention to detail, levels of health and safety awareness and consideration to tenants were consistent throughout, helping us achieve fantastic levels of both client and tenant feedback."*

# Case Study: United Biscuits (Jacobs)

Sprayed coatings to high level beams, J Block

Asbestos Services UK Ltd was appointed to remove high level asbestos sprayed coatings to the structural steelwork of J block.

This area of the site is vitally important to the day to day running of the factory as all the waste generated is processed here and washing of factory equipment carried out.

To keep the waste area in 24-hour operation the works were carried out in 5 phases with the design and planning of birdcage scaffold decks to allow the building of complex enclosures.

Our team of operatives carried out the works safely at high level using multi needle injection systems to remove the asbestos coatings via water and gravity, and eliminating all fibres to steelwork using Quill Falcon Kwikblast System to leave metal clean ready for priming.

*These works were carried out on time, to budget and with no disruption caused to the factory daily operations.*

## Case Study: Welsh Highland Railways

Ffestiniog Railway Station, Porthmadog – Internal/external asbestos removal, repair & encapsulation works

Asbestos Services UK Ltd was appointed as licenced asbestos removal contractor to carry out removal of High risk asbestos insulation board (externally) and carry out repair & encapsulation works of asbestos materials (internally). The Ffestiniog Railway Society exists to support the oldest independent railway in the world – now a historic and world-class tourist attraction.

The works were planned as part of a refurbishment scheme to extend the rear kitchen area and make way for a more modern larger cafe/eating area to accommodate the growing number of tourists who visit this beautiful, scenic part of the world.

The high risk removal works were programmed with an external enclosure to be erected to the rear soffit areas. Full enclosure set up was created externally and direct DCU connection fixed to the enclosure.

Site fencing was erected as a barrier around the trackside enclosure to warn third parties of the ongoing works.

Once again all asbestos insulation board was carefully removed and a full decontaminate clean of the enclosure area prior to being deemed safe for re-occupation by UKAS analyst – various short duration repair works were also carried out within the internal of the building.

*The contract was carried out over a one-week period to complete with a team of four operatives based in Porthmadog, with works completed within timescales and budget.*

# Case Study: The Stone House, Kent (Grade II listed site)

An ambitious project to bring history back to life...

Asbestos Services UK Ltd was proud to have been selected as a contractor to play a significant role in ensuring that this 15 acre site and its grade II listed buildings were given a sustainable new lease of life.

- A major redevelopment project requiring sympathetic restoration to meet the needs of future residential occupiers while preserving the architectural and historic significance of this 19th Century Grade II listed building and its setting.
- Project headed by The PJ Livesey Group  
The UK's leading specialist property developer, providing unique new homes in outstanding locations throughout the UK.

- Development partners:  
The PJ Livesey Group  
Ward Homes  
Homes & Communities Agency  
Moat
- Specialist contractors:  
Asbestos Services UK Ltd

**“** On redevelopment projects of such local historical significance, there can be no compromise on integrity.

*It is therefore crucial that only high-calibre specialists with the requisite expertise and experience are used.* **”**
